Washington Trials 2029 on Donald Trump's Abuse of Power and Treason

Washington Trials 2029 on Donald Trump's Abuse of Power and Treason

This story is about a real case. The Nuremberg Trials, which were the aftermath of war crimes and crimes against humanity committed by the Nazis during and before World War II.

The story that is also included is a comparison with a pure novel text and a pure fantasy. No one has committed any crimes that appear in the text and it is only there to be able to compare with the real crime from the 1930s and 1940s. The fantasy case has been chosen to take place in the future and the people can clearly not be guaranteed to be alive in 2028 or 2029.

The text, a draft of a script, is completely written by an AI service. Anyone who wants to try to write their own script for a book is free. Feel free to change the names of people before a book is possibly published.

The Legal Labyrinth: The legal groundwork for the trial is fraught with challenges. The defense teams, led by prominent and well-funded lawyers, argue the charges are politically motivated and that the evidence is circumstantial or inadmissible.
